### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claim 70** is rejected under 35 U.S.C. 102(e) as being anticipated by Wallace et al. (US 6,473,467) (hereafter Wallace).

**Regarding claim 70**, Wallace discloses the claimed subject matter “a conversion unit, ... in accordance with the select mapping scheme” including receiving report of channel state information from the receiving unit and adaptively select an optimal mode for transmitting signal via plurality of antennas (Fig. 1A, 1B, 3; Abstract; col. 2, lines 39-48; col. 7, lines 45-65; col. 8, line 53 to col. 9, line 47; col. 13, lines 14-21; col. 14, lines 31-43).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 56-69, 71-78** are rejected under 35 U.S.C. 103(a) as being unpatentable over Wallace.

**Regarding claim 71-72**, these claimed subject matter would have been obvious to one skilled in the art as application specific or design preference. For example, the channel state information in Wallace could have included gain, phase amplitude, SNR, etc. (col. 8, line 53 to col. 9, line 27).

**Regarding claims 56, 64, 73, 76**, similar analogy as that in claims 71-72 above.

**Regarding claims 57-63, 65-69, 74, 75, 77-78**, all these claimed subject matter would have been design specific based on Wallace (whole document).

***Allowable Subject Matter***

5. Claims 1-55 are allowed.
